Here are the well logs. For some reason they don't show up in the map view search.

Thanks for checking into that. Look like there may be a cluster of wells at 19500 NE 80TH ST, REDMOND as well also owned by the City of Redmond. Although they are quite a distance from the site at about 0.5 miles. Do you feel these would be too far?

Hi Brandon,

Ecology's well log database does list a well at the address (7901 196th Ave NE) for Arthur Johnson Park; however, it appears that it was abandoned in September 2008. We would not be able to collect a sample, as the well was abandoned by filling the casing with bentonite chips to 3-feet bgs and cement from 3-feet bgs to the surface.

Hi Jeff

Can you find out if the park Mr. (b) (6) references contains a well? I believe it would be the Arthur Johnson Park.

Hello Brandon,

Thank you for contacting us about the request to test water samples as part of the EPA CERCLA investigation of Gunshy Manor.

Please note (b) (6). I have knowledge of an old well on adjoining City of Redmond Park property. That well is abandoned which may be of interest.

Please feel free to call me at (b) (6) and leave a message if I do not answer.

Thank you,

(b)
